

AI TEACHER MODEL TAG

General

1. Instructional Moves (Presentation & Modeling)

These moves occur when the teacher is the "Source of Expertise" or "Instructor".

- **Contextualizing:** Presenting new language through an anecdote, picture, or situation to establish meaning.
- **Modeling/Acting:** Performing a dialogue or mime to demonstrate how language is used in context.
- **Verbal Explanation:** Providing explicit information about grammar rules, word meanings, or connotations.
- **Concept Questioning:** Asking specific, closed questions to verify if the student understands a new concept (e.g., "Is it happening now?") rather than just asking "Do you understand?".
- **Physical Demonstration:** Using mime, gesture, or pointing to objects to convey meaning without translation.
- **Translation:** Providing the L1 equivalent of a word or phrase, often used for efficiency with beginners.

2. Interactional Management (Flow & Participation)

These moves focus on the "Manager" and "Organizer" roles to direct the lesson discourse.

- **Initiating (The 'I' in IRF):** Starting a sequence by asking a "display question" (a question the teacher already knows the answer to) to get the student to speak.
- **Eliciting:** Prompting the student to provide a specific word, rule, or idea rather than giving it to them.
- **Nominating/Turn-giving:** In 1v1, this involves explicitly handing the floor to the student after an instruction .
- **Transitioning:** Signaling a move from one lesson stage to another (e.g., moving from "Practice" to "Production").
- **Monitoring:** Staying silent and observing while the student performs a task, acting as a "monitor" rather than an active participant.

3. Scaffolding & Facilitation (Supporting Performance)

These moves help the student complete tasks they cannot yet do alone.

- **Prompting:** Giving a hint, such as the first sound of a word or a synonym, to help the student retrieve language from memory.
- **Negotiation of Meaning:** Asking for clarification (e.g., "What do you mean by...?") to force the student to rephrase and improve their output.
- **Recasting:** Repeating the student's incorrect utterance in its correct form without stopping the flow of conversation.
- **Reformulation:** Rewriting or re-saying a student's entire idea into more natural, sophisticated language.
- **Strategy Training:** Explicitly teaching the student how to use a learning tool, such as a dictionary or a vocabulary notebook.

4. Error Handling & Feedback (Corrective Moves)

These moves define the teacher as an "Assessor," "Corrector," or "Evaluator".

- **Immediate Correction:** Stopping the student mid-sentence to fix a mistake, typically used during accuracy-focused practice.
- **Delayed Feedback:** Noting errors during a fluency task and addressing them after the student has finished speaking.
- **Self-Correction Prompting:** Using a gesture or a facial expression to indicate an error has occurred, allowing the student to fix it themselves.
- **Evaluation (Praise/Critique):** Providing a judgment on the student's performance (e.g., "Yes, good" or "Not quite").
- **Emphasizing Weak Forms:** Highlighting specific phonological features, like the "weak" sound of 'have' in 'might have', to improve pronunciation.

5. Affective & Social Support (Climate Building)

These moves lower the "Affective Filter" and build the teacher-student relationship.

- **Reassuring:** Providing verbal comfort to reduce anxiety during difficult tasks.
- **Encouraging Contributions:** Validating the student's ideas to promote risk-taking and assertiveness.
- **Personalizing:** Connecting the lesson content to the student's real life or personal interests.
- **Listening:** Stepping into the "Listener" or "Counsellor" role to provide psychological support during the learning process.

Tagging Summary

- **Presentation:** Contextualizing, Modeling, Explanation, Translation.
- **Interaction:** Eliciting, Initiating, Monitoring, Nominating.

- **Correction:** Recast, Immediate-Correction, Delayed-Feedback, Self-Correction-Prompt.
- **Facilitation:** Prompting, Clarification-Request, Reformulation, Concept-Checking.
- **Affective:** Encouraging, Reassuring, Personalizing.

Speaking

1. Awareness-Raising Moves (Guided Noticing)

These moves are used to help students uncover gaps in their knowledge by focusing their attention on specific language features.

- **Activating Background Knowledge:** Setting the context or topic to situate the student mentally before input.
- **Checking Gist/Detail:** Asking questions to ensure the student understands the overall meaning or specific facts of a spoken text.
- **Checking Register:** Verifying if the student recognizes the level of formality or the relationship between speakers in a given context.
- **Guided Noticing (Focus on Features):** Directing the student to **identify, count, or classify** specific features like discourse markers, performance effects (fillers), or vocabulary within a transcript.
- **Comparing/Contrasting:** Asking the student to look at two versions of a text (e.g., a transcript vs. a narrative) to notice differences in spoken grammar.
- **Highlighting Stress and Intonation:** Using recordings to point out how pitch changes or word stress signal meaning and turn-taking.

2. Appropriation Moves (Practised Control)

These moves provide a supportive framework (scaffolding) for the student to practice control over new language.

- **Modeling:** Providing a clear "expert" example of the target language or task for the student to imitate.
- **Drilling:** Conducting choral or individual repetition of "chunks" or speech acts to gain articulatory control.
- **Prompting (Slot-filling):** Providing a sentence starter or a hint to help the student retrieve the correct language item.
- **Eliciting:** Using visual or verbal clues to get the student to produce the next line of a dialogue or a specific word.

- **Dialogue Building:** Establishing a situation and eliciting the interaction line-by-line from the student to co-construct a conversation.
- **Dictation:** Dictating useful expressions for the student to write down and later use in speaking.
- **Rewriting/Reformulating:** Asking the student to modify a written dialogue to make it more formal, interactive, or idiomatic before speaking it.

3. Autonomy Management Moves (Free Production)

These moves focus on the student's ability to self-regulate and use language in real-time "operating conditions".

- **Setting the Task:** Giving instructions for a communicative activity like a role-play, presentation, or debate.
- **Monitoring:** Stepping back and staying silent while the student performs, acting as an observer rather than a participant.
- **Tolerating Silence:** Refraining from filling gaps between turns to put pressure on the student to initiate talk.
- **Negotiating Meaning:** Asking for clarification (e.g., "What do you mean by...?") to force the student to rephrase and improve their output.
- **Extending Exchanges:** Asking follow-up questions to encourage the student to sustain their speech beyond one or two sentences.

4. Feedback & Error Handling Moves

These moves define the teacher's role as an **Assessor** or **Corrector**.

- **Recasting/Reformulation:** Repeating the student's message in a more natural, correct form without explicitly stopping the flow.
- **Immediate Correction (Focus on Form):** Stopping the student mid-utterance to address a formal error, typically during accuracy-focused stages.
- **Conversational Repair:** Intervening in a way that is perceived as a natural part of the conversation to fix a breakdown in communication.
- **Delayed Feedback:** Noting errors during a task and providing a summary of "points to note" after the student finishes.
- **Providing Natural Feedback:** Using evaluative language (e.g., "Right," "Interesting," "Good") to respond to the **content** of the message rather than the form.
- **Praise/Validation:** Highlighting things the student "succeeded in doing" to lower the affective filter.

5. Interactional Management Moves

Moves used to regulate the discourse and build a "talking classroom".

- **Display Questioning:** Asking questions the teacher already knows the answer to in order to elicit language.
- **Referential Questioning:** Asking "genuine" questions where the teacher does not know the answer, to build the topic together with the student.
- **Transitioning:** Signaling a move from one stage of the lesson to another (e.g., "Let's move to the task").
- **Strategy Training:** Explicitly teaching the student how to use communication strategies like circumlocution or appealing for help.
- **Nominating/Turn-giving:** Explicitly handing the floor to the student to ensure they have an equal share of the interaction.
